

HP Industry Standard Server new products.

Last month HP announced the first Generation 6 (G6) platforms with Intel's Xeon 5500 family of processors (otherwise known as 'Nehalem-EP'). The first group of G6 servers are two socket Intel platforms with four socket Intel with the next generation AMD powered platforms following later this year.

HP have also introduced a new family of power supplies that are more efficient and you can now choose the power supply that best fits the usage profile of the server – again helping to ensure that the server can be operated at it's most efficient. Internal storage has also seen a marked improvement – the 1U DL360 G6 now supports up to 8 x SFF SAS/SATA drives whereas the 2U DL380 G6 now supports up to 16 x SFF or 6 x LFF SAS/SATA drives.

The new disk capabilities are significantly enhanced by a new generation Smart Array controller family that offers up to 200% greater performance and 100% backward compatibility.

And the New models are.....

HP ProLiant DL370 G6 (4U rack optimized) server delivers Industry-leading management tools, leading performance, expandability, flexibility and the latest energy efficient technologies. The HP ProLiant DL370 G6 has been optimized for virtualization and consolidation environments, it is well-suited for deployment in growing businesses, remote office sites, or datacenters and has been designed to bring you (our customer) the utmost confidence to run your business.

HP ProLiant ML350 G6 With the latest technology, the HP ProLiant ML350 G6 tower server offers adaptable, reliable mainstay for your business.

HP ProLiant ML150 G6 The affordable HP ProLiant ML150 G6 server is a high value solution for small to medium businesses that need the power to handle today's problems and expandability for future growth.

HP ProLiant DL380 G6 The HP ProLiant DL380 G6 extends its history of design excellence with enterprise-class uptime and manageability, proven 2-socket Intel® Xeon® performance, and 2U density for a variety of rack deployments and applications.

HP ProLiant DL360 G6 Combining concentrated 1U compute power, integrated Lights-Out management, and essential fault tolerance, the DL360 G6 is optimized for space constrained datacenter installations.

HP ProLiant DL180 G6 The HP ProLiant DL180 G6 is an affordable 2U, dual processor capable server that delivers essential performance and power efficiency for 32-bit and 64-bit applications. Developed specifically to address the needs of small and medium businesses, the DL180 G6 is an incredibly versatile server offers an array of new innovations and features that set it apart from other ProLiant servers and the competition.
